If we understand the case aright, the eargo of the bark Comet was obtained as the cargoes of whalers and traders at the North have been obtained for forty years past. The oil, bone, ivory and skins which constitute their catchings are purchased from the Indians, residor either on Russian or American territory, or taptured in the legitimate pursuit of their vocation in American or foreign juland waters. This has so long been the custom that it has become virtually legalized by usage, and no custom house Moer would think of trying to find what bone what oil of the millions of gallons and pounds eturned was obtained in Russian territory, for the flag, on all such voyages, overs the outch. It well known that the Russian Government more than once forbade American whalers from cruising or teading in its waters, and even sentwar vessels to warn them off; yet no one ever eamed that the oil and bone obtained from its cargo, even if procured according to usage in foreign uncivilized territories.
